Abstract

Template for a paper or a poster presented at IMC2004 from an imaginary person.

1 Introduction

This article presents how to make a correct paper with pictures and tables. At the end are also examples of references.

2 How to make a picture

Here is a picture. It should be send in jpg or tiff format in 200 dpi. The definition of width is based on the width of the original picture (Figure 1).

Figure 1: *Photograph of the Albergue Universidad (Koschny et al., 2004).*

3 How to write a table

Here is a table of our observations (Table 1).

Table 1: *Details of the two observing locations from a paper in IMC Proceedings 2003 (Koschny et al., 2004).*

| Name | Latitude | Longitude | Altitude |
|------------------------|-----------|------------|----------|
| Pueblo de Don Fadrique | 37°58'58" | -02°28'54" | 1500 m |
| Albergue Universidad | 37°03'51" | -03°23'05" | 2500 m |

4 Conclusion

This article is just for those who will use Latex to write a paper for the IMC2004 proceedings.

5 Acknowledgements

Thanks to all those authors who will use this template, to ease the editor's work on Proceedings 2004.
