Meteorcamera network in Hungary

Development of the network in Hungary

Development of the network in Hungary

Development of the network in Hungary

Hardware overview

- Watec: 6x
- Mintron: 4x
- Supercircuit: 4x

Computar 6mm: 1x Computar 3.8mm: 5x Computar 4mm f1.0: 1x Fujinon 2.8x2.8: 3x Goyo: 3x Panasonic 6mm: 1x

Further technical details

- Matrox II and Multichannel cards
- All with Metrec WinXP
- Remote control with Logmein (via 8080 port)
- Regular ftp upload to central server

Costs / financing

2011 July

280

- Mintron + Panasonic 6mm
- Mintron + Computar 3.8mm
- Watec + Computar 6mm
- Watec + Computar 3.8
- KTC + Goyo

- ~ 600 EUR 290
- ~ 600 EUR
- ~ 500 EUR 280
- ~ 500 EUR 260
- ~ 150 EUR 150

Locations

- Homes of amateours: 9x Institutes: 5x
 Preferred model: co-operation with institutions
- Internet connection, electricity, good sky,
- mutual benefits, education

Relations

Relations

• PKIM, CeMENT, CMN, MBK

Web page

- <u>www.videometeor.hu</u>
- on-line upload (within 1 min)
- Monthly rarities

2011 Aug 5 fireball

2011 Aug 5 fireball

2011 Aug 5

• Pavel Spuny, Damir Segon, Enrico Stomeo, Juraj Toth

Conclusions

- Important to define the aim of meteor observation

- 1. Provide quality data for the IMO network, increase our contribution, area coverage and uptime
- 2. Multistation analysis of fireballs in order to be able to act in case of meteorite falls
