### Abstract

Template for a paper or a poster presented at the IMC 2006 from an imaginary person.

## 1 Introduction

This article presents how to make a correct paper with pictures and tables. At the end are also examples of references.

## 2 How to make a picture

Here is a picture. It should be send in jpg or tiff format in 200 dpi. The definition of width is based on the width of the original picture (Figure 1).

Figure 1: *Photograph of the Albergue Universidad (Koschny et al., 2005).*

## 3 How to write a table

Here is a table of our observations (Table 1).

## 4 Conclusion

This article is just for those who will use Latex to write a paper for the IMC 2006 Proceedings.

Table 1: *Details of the two observing locations from a paper in the IMC Proceedings 2003 (Koschny et al., 2005).*

Name	Latitude	Longitude	Altitude
Pueblo de Don Fadrique	37°58'58"	−02°28'54"	1500 m
Albergue Universidad	37°03'51"	−03°23'05"	2500 m

## Acknowledgments

Thanks to all those authors who will use this template, to ease the editor's work on the IMC Proceedings 2006.
