

# Title of this paper

S. Sheep and T. Bear

Armagh Observatory, College Hill, Armagh, BT61 9DG, United Kingdom  
sheep@arm.ac.uk

Template for a paper or a poster presented at the International Meteor Conference held in Armagh in 2010 September.

## 1 Introduction

This article presents how to make a correct paper with pictures and tables. At the end are also examples of references.

We may make small changes to the style after we have everyone’s papers, when we are finalising the proceedings volume. Nevertheless, this example template paper shows the style fairly similar to what we intend. For example, we presently use the slightly smaller font of WGN rather than the slightly larger font of various IMC proceedings, in case there are a large number of proceedings papers this year (since there were a large number of contributions at the conference).

Try not to exceed 4 pages unless you have agreed with us in advance how many pages you need.

## 2 How to make a picture

Here is a picture (Figure 1). Make sure that axis labels etc. in plots are big enough to be readable!

Figure 1 – Photograph of one of the authors chairing the IMC.

The proceedings will be printed in black and white – be sure your figures look ok in greyscale. Optionally, you can submit different versions of your figures for the electronic version of your paper (which can be in colour) and the printed version.

## 3 How to write a table

Here is a table prepared in LaTeX (Table 1).

Species	Number
Sheep	1
Teddy bears	120

Table 1 – Numbers of different kinds of participants attending IMC 2010.

## 4 Formatting and citing references

If you know BibTeX, please use it. The file `sheep.bib` provides examples of references that are books (Rendtel & Arlt, 2008), journals (Asher, 2010), proceedings papers (Koschny et al., 2006), webpages (Vaubaillon, 2005) or the IMO-News mailing list (McBeath, 2006).

If you don’t know BibTeX, don’t worry, we can format your references.

## 5 Conclusion

The file `sheep.tex` is just for those who will use Latex to write a paper for the IMC2010 proceedings. If you don’t use LaTeX, don’t worry, we’ll format your paper in LaTeX; you can still look at `sheep.pdf` for an example of what a paper will look like.

## Acknowledgements

Thanks to all those authors who will use this template, to ease the editors’ work on Proceedings 2010. This example Latex file is loosely based on the equivalent provided on the website for the 2005 Oostmalle IMC proceedings.
